I'm super busy, but not with meetings, so I can fit a quick meeting in anytime today before 4 pm. Let me know what works for you.

Also, Michelle, I couldn't ever tell what you wanted to do about the modeling input table. Do you want to push back, or do you want to get ORC involved? We can talk about that at the meeting, too, if you like.

Jaime

We may not be able to include a table with the Eramet inputs because I think some or all of that information may be CBI. I'm checking into it, but I doubt I'll be able to get an answer today. I may have to do some extensive research in the office--and my next day in is Thursday.

Just FYI.

Manganese question

Jaime Wagner to: Michelle Colledge

09/25/2012 08:53 AM

This message is digitally signed.

I was looking at some slides about the Ferroalloys RTR and I saw something that interested me. It was a slide discussing the various agencies' Mn benchmarks, and it listed ATSDR's as 0.04 ug/m3 with the caveat "Revised ATSDR value expected soon." I didn't realize that you guys were revisiting this value again. Do you know if the new value will be higher or lower? I'm not really involved in the RTR stuff anymore; this is merely personal curiosity.

Manganese health results ?

Theresa Hosick to: Michelle Colledge

09/04/2012 01:48 PM

Hi Michelle,

Steve told me that you were interested in some references I have seen where the health study results claim there is no difference between Marietta and control groups. Here are some that I found this morning.

<http://online.sfsu.edu/~mnstudy/study.html>
study

Bowler's results for July 2009

<http://www.theanchornews.net/index.php?limitstart=124>
The Anchor June 22, 2010

Some news article from

http://www.theanchornews.net/index.php?option=com_content&view=article&id=1142:eramet-appeals-ep-a-rules&catid=1:localpolitical&Itemid=15
The Anchor May 9, 2012

<http://www.mariettatimes.com/page/content.detail/id/543857/New-EPA-rules-threaten-Eramet.html?nav=5002>
Marietta Times May 2, 2012

The article from the Marietta Times does not refer specifically to the results of the health study, but claims that the new rule proposal is based on bad science.

Steve also said that further studies are suggesting that there is a real effect. We are really interested in how this turns out. Please keep us in the loop as you find out more. Also, in the future if we can be of help to you we'd love to work with you again!

Theresa

Subject: Fw: One more question re: revised Mn MRL

Rae and Margaret:

If I set up a call with ATSDR management to discuss our MRL and your MACT standard-who would be invited to the call from EPA? (see discussion below).

I have the candy ready :-). See you tomorrow!

Lynn-

Our work in Marietta with Eramet (I am site lead), the modeling we did in 2004-2005, and the air investigation we funded that followed prompted an accelerated residual risk assessment for the impacts of Eramet Mn emissions on the surrounding community. That accelerated residual risk assessment was done to speed up the revision of the MACT, justified based on risk to Mn (NEIC also conducted fingerprinting of the Mn particulate as I requested so we could determine the respirable fraction of the Mn-as expected from a smelter, it is respirable (83% is <PM10; 21% <PM2.5)). The proposed rule was posted on the federal register last fall. Since Region 5 is the only region that has a Mn ferro-alloy smelter, our region took the lead on the MACT revision. Eramet was built in the 50s and 60s, so is grandfathered out of a lot of process standards until they upgrade/request new permits on new equipment.

Marietta monitors : modeled results

Hi Jaime,

Yes, the coordinates are all in WGS-84.

Sorry for the slow reply... I'm in class through today. But if you have more questions, I'll get back to you ASAP.

Thanks,
Rand

MRL for Manganese 
Shilpa Patel to: Michelle Colledge

01/24/2013 10:45 AM

History: This message has been replied to.

Hi Michelle,

I hope all is well. I know we haven't talked about SH Bell in awhile, but I heard through Ohio EPA that ATSDR changed MRL for Manganese recently. Is that true? If so, can you send me the documentation showing the change.

Thank you,
 Shilpa Patel
 Environmental Engineer
 Air Enforcement and Compliance Assurance Branch
